

SUMMARY

Results-driven AI and software engineer with over five years of professional experience in developing innovative, large-scale software and machine learning solutions. Expertise spans conversational AI, full-stack development, and data science, with a proven track record of leading cross-functional teams, enhancing product functionality, and significantly improving user experience.

EDUCATION

Master of Science in Information Technology <i>Carnegie Mellon University</i> Specializations: Artificial Intelligence, Software Engineering	Aug. 2024 — 2025
Bachelor of Science in Computer Science <i>University of Kigali</i> Specializations: Computer Science, Information Systems	Jan. 2020 — May. 2024
Bachelor of Science in Information Technology <i>KIM University</i> Specializations: Software Engineering, Information Systems	Sept. 2017 — Dec 2020

PROFESSIONAL EXPERIENCE

Graduate Teaching Assistant <i>Carnegie Mellon University</i> - Developed and led Python coding exercises, significantly increasing student engagement with practical applications - Managed bi-weekly recitations for a class of 52 students, which resulted in a 15% average improvement in student performance on technical assessments. - Provided targeted support to students in defining their research goals, leading to the successful completion of 100% of student research proposals.	Aug. 2025 — Dec. 2025
Conversational AI Engineer <i>RealTalkr.ai — UAE, Part-time Remote</i> - Fine-tuned conversational parameters—including tone, pitch, structure, and duration—to enhance user interaction and optimize lead conversion. - Implemented frontend and backend functionality for users to interact with the AI models with multiple parameters for users to finetune.	Mar. 2025 — 2025
Graduate Admissions Assistant <i>Carnegie Mellon University</i> - Manipulated and prepared data of 2000 African universities and thousands of applicants. - Implemented a data processing pipeline for African universities reducing processing time by 75%	Aug. 2024 — Dec. 2024
Software Engineer <i>Waysense AI — UK, Remote</i> - Developed user-facing components and contributed to the core business logic, enhancing product functionality - Conducted research on multiple state-of-the-art Large Language Models for explainable AI in driving applications - Implementing Augmented reality objects in Navigation App for improved customer experience	Mar. 2024 — Aug. 2024
Software Engineer <i>BBIncubator.org — Cameroon, Remote</i> - Led cross-functional teams in developing multiple internal software solutions, including CEMP, Babo health, and Tsora Skills - Managed project timelines and resources, resulting in on-time delivery for 95% of projects - Mentored junior developers, increasing team productivity by 30% through knowledge sharing and best practices implementation	Mar. 2021 — Aug. 2023

RESEARCH EXPERIENCE	
Graduate Research Intern <i>Carnegie Mellon University</i> - Collaborated with a supervisor to conduct a literature review of over a dozen state-of-the-art material science models, identifying a key research gap in Equivariant Neural Networks for atomistic dynamics. - Performed mathematical derivations of Clebsch-Gordan Coefficients, Addition theorem to gain a deeper understanding of Spherical Harmonics, which are foundational to Equivariant Neural Networks in Molecular Dynamics.	Jun. 2024 — Aug. 2025
Research Software Engineer <i>Universität Witten/Herdecke — Germany, Remote</i> Assisted Prof. Stanley Mungwe in the FeverApp redesign (20k+ users); features across Flutter/Laravel/Django/FastAPI.	May. 2023 — Dec. 2023
Data Engineering <i>Mental Health Research — Nigeria, Remote</i> - Engineered an Information Engine using Python, increasing data retrieval efficiency by 80% - Processed and categorized data from 200+ sources into 20 mental illness categories, facilitating more accurate research outcomes	Dec. 2022 — Jun. 2023
Research Assistant <i>Imperial College London — UK, Remote</i> - Collected and analyzed COVID-19 policy data from 20+ countries, contributing to global pandemic response research - Compiled and structured data from 80+ websites, 500+ documents, and 300+ video links, improving data accessibility for researchers in HDF4 Format	May 2021 — Sept. 2022
VOLUNTEER EXPERIENCE	
IT Support • Software Developer <i>Rise to Shine Organization — Rwanda, on-site</i> - Developed and maintained the organization's website. - Employed IT support skills to repair and maintain organization laptops and equipment. - Developed a Child Behavioral Report (BIR) System to manage and transform child behavior. - Helped the school and kids transition online during the Covid-19 Pandemic	Dec. 2020 — Aug. 2024
Google Crowdsourced ML Facilitator <i>Google Crowdsource — Rwanda, on-site</i> First Google ML facilitator at University of Kigali, organized several events with Google students and connected Google crowdsourcing with school administration.	Dec. 2021 — Dec. 2022
Google Developer Student Club Lead <i>Google Developers — Rwanda, on-site</i> - Helped establish the first developer club on campus, which later became GDSC. - Trained peers in Android development and web development using Google technologies. - Conducted bi-weekly meetups with an average attendance of about 18 people.	Dec. 2019 — Dec. 2020
ACHIEVEMENTS	
- First Google DSC Lead at KIM University – Founded KIM Developers Student Clubs - 2018 - Nominated student leader for computer science/IT department (KIM University - 2018) - Youngest Leader to speak at the Deeper Life Leadership Strategy Congress 2019	
SKILLS & CERTIFICATIONS	
Certifications - Coursera: Java for Android, Machine Learning, Introduction to Artificial Intelligence, Python for Everybody, Python Data Structures, Software Project Management Programming Languages: Python, Dart Typescript, Java, C Frameworks: Pytorch, Numpy, Scipy, Sklearn, Pandas, Matplotlib Tools: Flutter, Angular, Django, Flask, FastAPI, etc.
